

JUST GLEANINGS

MASSEY HEADS WHEAT PARLY

Hon. Vincent Massey, Canadian High Commissioner in London and three others will represent Canada at the international wheat advisory meeting which opens in London January 10.

CAPONE IS OUT OF ALCATRAZ

SAN FRANCISCO—Al Capone, the former Chicago gang leader, was transferred Saturday from Alcatraz Island federal prison to the Federal correctional institution on Terminal Island, San Pedro. He was removed secretly from Alcatraz and taken by train to Terminal Island where he will remain a year on a misdemeanor charge.

TOM MOONEY FREE ONCE MORE

SAN FRANCISCO—After serving 22 years in prison for an alleged participation in a Pi-pareness Day bombing in San Francisco on July 22, 1916, in which 10 persons lost their lives and 40 injured, Thomas Mooney was granted a pardon by California's newly elected governor, Culbert L. Olson, to celebrate Mooney's release from prison labor leaders arranged a parade in which thousands participated.

Mooney was convicted of setting the bomb which caused the loss of lives. For 22 years a great number of organized labor cried fruitlessly against his conviction—that it was a frame-up because he was a labor agitator.

GOEBBELS FACES DISCHARGE

According to a dispatch from London regarding the truth of a widely circulated report that Dr. Joseph Goebbels was almost beaten back by friends of Gustav Frolich—who was put into a concentration camp in order that Goebbels might make love to the lovely Frau Frolich—one thing is certain; it will take plenty of propaganda to keep the dwarfish Goebbels in his powerful position as Reich propaganda minister.

With Hitler reportedly enraged at the behavior of his minister, Goebbels, subtleties of stratagems and master of psychology will have to pull one of the slickest tricks of his remarkable career to keep his high place.

Exposure of his philanderings is a severe blow to Nazi dignity.

CANADIAN FISH PROVIDERS

Canadian fish gets its superb flavor because our waters—both fresh and salt—are always pure and cold.

2. Canadian fish is an excellent source of Vitamin A—which promotes growth and enables the body to resist disease.

3. Canadian fish furnishes Vitamin D—vital to proper bone formation in children, and helps to prevent rickets.

4. Canadian fish supply calcium and phosphorus, which are required for building sound bones.

5. Canadian fish are available all the year round—fresh, frozen, canned or otherwise prepared.

6. Combine Canadian fish with milk and get two essential food elements in one dish.

8. Eat Canadian fish once a day for the nutritive value and energy it furnishes—particularly when the wind blows cold.

DRUMHELLER RURAL S.D. SECRETARY IS TO BE APPOINTED THIS WEEK

Office of Enlarged School Area Above Drumheller Garage

The five new trustees elected to the newly organized Drumheller Rural School Division met at Drumheller on January 4th to discuss plans for operation and to receive applications for the position of secretary-treasurer.

There were 19 applications for the position and these were narrowed down to three by the trustees, and a special committee was named to select the final applicant.

W.E. Frame, acting secretary for the present, stated that the new division has its office above the Western Garage, almost opposite the post office, in Drumheller, and anyone interested may interview the secretary there.

There will be no radical change in school administration and officials will concentrate on getting in getting the new division established.

A scheme for the consolidation of school divisions was discussed by the trustees as an economy measure, and this matter was left in the hands of the special committee.

It is expected that the new secretary-treasurer will be announced at a meeting of the Board of Trustees on January 11.

The draw for the Candlewick Bazaar which was made by the Duke of York Chapter I.O.O.F. was held at the picture show on Thursday night. The lucky ticket was drawn by Dick Garrett and was number 525 held by Miss Edna Dances of Banff. The Duke of York Chapter wish to thank all those who bought tickets on the night.

The following players have entered the annual handicap chess tournament of the Carbon Chess Club: H. Birch, W.A. Braisher, D. Code, W. Dixon, H.A. English, Roy English, V.B. Hawkins, E. Heath, T. Laing, H. Longstaff, C. McPherson, J.D. Paynter, H. Purdy.

A rink composed of J. Poxon, skip, M. Leitch, F. McKibbin and George Tutt is representing Carbon this week at the Drumheller bonspiel.

Owing to an outbreak of Scarlet Fever the primary room of the Carbon school was closed and fumigated this week.

The International Utilities Corporation has purchased the plant and system of the Union Power Company at Drumheller.

The Carbon Curling Club has 12 complete rinks this year and the annual bonspiel will be held in February.

OFFICERS OF CARBON LODGE

The following officers were installed at a meeting of Carbon Lodge No. 107, A. F. & A. M. held on Tuesday, December 27th:

W. Bro. T. G. Calman	Master
W. Bro. H. E. Brown	L.P.M.
Bro. H. C. Wilson	S.W.
L.C.E. Poxon	J.W.
W. Bro. L. Poxon	Treasurer
R.W. Bro. W.A. Braisher	Secretary
W. Bro. J.H. Oliphant	Chaplain
Bro. C. Oliphant	S.D.
Bro. C. Poxon	J.D.
R.W. Bro. W.A. Braisher	Registrar
R.W. Bro. J.F. Jessant	S.S.
W. Bro. V.B. Hawkins	S.S.
Bro. A. Hovik	D.S.
W. Bro. H.A. Evans	T.J.G.
W. Bro. W.R. Van Loon	Tyler

LITTLE ITEMS OF LOCAL INTEREST

A light snow fell Monday night, but the weather cleared off Tuesday and the weather still prevails.

Hugh Brown was taken to Calgary Sunday and will have undergone an operation Wednesday.

Two Carbon rinks are taking in the Acme bonspiel this week. Skip Flaws has Rev. MacDonald, Bert Charlbois, and Chas. Pattison. Skip Alex Tuxon has Mick Skerry, Cy Poxon and Bob Stull.

The Rev. and Mrs. Frederick Alf and son, Vernon, arrived Thursday from Linton, North Dakota, and have taken up residence in the Freudenstadt Baptist church pastorage in Carbon.

C. W. Gray came out from Calgary last week and is disposing of his stock in the hardware store.

Mr. and Mrs. V.J. Harney and family returned Sunday from a three weeks vacation spent with relatives at Lethbridge.

Gerry Pickard was taken to the Drumheller hospital last Saturday suffering from pneumonia. Latest reports are that his condition is improving.

A number of Carbon merchants attended the Retailers' banquet and meeting in Drumheller Tuesday evening.

The C.G.I.T. held a sleigh riding party on Tuesday night, going out to the home of Mr. and Mrs. Alex Shaw. Stanley Gouldie and Albert Gleck were the teamsters.

Alex Todd was a business visitor to Calgary Saturday, making the trip with Harley Wilson.

Sammy Malton of Calgary is spending a few days with his aunt, Mrs. K. Wilson.

Miss Violet Grafon returned to Calgary Saturday after visiting in Carbon. Some of her friends are Harry Woods.

Mr. Gouldie was a Calgary visitor last week.

Carbon defeated Rosedale in a game of hockey at Hesketh on Sunday.

ODDS AND ENDS

It is estimated that sixty world nations will spend \$17.5 billion for war purposes during 1939 as compared with \$3.8 billion spent for military and naval preparations by the same nations in 1932. Russia is spending 40 per cent of her national income on war preparations, Japan about 37 per cent, Germany 30 per cent, France 9 per cent and the U.S.A. about 1.6 per cent of the national income.

The United States Government is planning the expenditure of \$4 million to search for newer and wider markets for agricultural commodities. Four regional research laboratories will be established for this purpose, and a carefully co-ordinated program is being drawn up which will make the activities of each laboratory nation-wide in the effect of their use upon commodities imported.

At a rough estimate the number of cattle in the world totals around 600 million, sheep around 750 million and pigs about 250 million.

Last year Canada exported about 5,300,000 Christmas trees to the U. S. The Nova Scotia balsam is preferred above all other Christmas trees.

Because of the relatively high price of corn, wheat is being used more extensively for stock feed in Europe. The low quality of the Danube wheat has also contributed to its use for livestock feed rather than for human consumption.

Australia's 1938 wheat crop may be under the estimated 135 million bushels, according to private advices.

RECEPTION HELD FOR REV. AND MRS. FREDERICK ALF

Rev. and Mrs. Frederick Alf and family arrived last Thursday from Linton, North Dakota, and have taken up residence in the Freudenstadt Baptist church pastorage in Carbon.

The Rev. Frederick Alf has been the pastor at the Baptist Church, Linton.

Batteries should have charge of the catering at the rink during the 'spiel.

Preparations are gradually being completed for the annual bonspiel of the Carbon Curling Club, which will be held next Tuesday, Wednesday and Thursday, January 17, 18 and 19.

There will be two main competitions and a blue ribbon event from the surrounding towns, keen competition is anticipated.

The Ladies' Aid will have charge of the catering at the rink during the 'spiel.

QUIET MEETING OF COUNCIL OF CARBON MUNICIPALITY

Mostly Routine Business Dealt With by Members

Very little new business was transacted by the Council of the Municipal District of Carbon at their regular meeting in Carbon on Tuesday, January 10, when all members were present.

Routine business such as relief and passing of accounts for payment took up most of the Council's time.

A communication was received from the Canadian Pacific Railway Company regarding the drainage of land at Hesketh where water has been running over the track and the Railway Company stated that they would undertake the task of correcting this.

Councillors H. J. Crowell and J.R. McEwan were appointed a committee to investigate the condition of the roads at the present time.

Lighthouse On Mountain Top To Guide Trans-Canada Planes Over The Rockies

A five-man and a woman face a hard winter and the clouds atop mountain peak to operate an aerial lighthouse just completed to guide Trans-Canada Airlines planes over the Rockies.

In a wind-whipped little cluster of buildings on the summit of Mount Carmel, 200 miles east of Vancouver, the staff of the new Dominion transport department radio range station expect to be snowed in for weeks at a time at their task of maintaining a 24-hour service of radio signals to steer the airline pilots among the jagged peaks in a straight line from Lethbridge, Alta., to Vancouver.

Four operators, a handyman and his wife have begun the winter vigil in the interests of airline safety. Their perch at an altitude of 4,000 feet is the loftiest of the 21 radio "lighthouses" across the Trans-Canada route. Automatic transmitters will send a steady stream of signals out into the thin mountain air to the earphones of the pilot in the gleaming metal airliner drumming through the conditions in the air. The operator will break into the "range" monotone occasionally to report the weather conditions in the air. The Carmel station is also a meteorological bureau.

If the pilot's sight of the ground is blocked off by low clouds and snow or the darkness of night and he gets off the beam, he will hear a different letter in the monotone and knows from that particular letter whether he is to the right or left of his true course. A radio range aid to safety, high-frequency signals from special ground stations light a red bulb on the instrument panel to show the pilot he is over the Rockies if he cannot see them.

The new range station forms part of a new route "over the top" of the Rockies a year ago started by Trans-Canada planes flying from Vancouver to Cranbrook, B.C., before alighting north again to Vancouver. This new flight line cuts straight over the mountain from Lethbridge to Cranbrook, B.C., Nelson, Carmel, Princeton and Vancouver. Considerable saving in distance is achieved. In addition to the Carmel station, another one has been set up at Crested Valley, 15 miles west of Nelson, and one at Cowley, Alta.

The Grand Forks route will be made an alternate route, so if there is a "zen" ceiling" over the Carmel run, service can be diverted via Grand Forks.

Throughout the autumn, engineers toiled at setting up Carmel station on the mountain peak. A road had to be built up the steep slope to haul the building materials and the heavy radio transmitters to their position. The "zen" ceiling" was the snowdrifts to the top, where they built the station, living quarters, and an independent power plant.

Losses Fortune

Japs Destroy Property In Canton Of Chinese Who Made Good In America

Charlie Tso of Canton, once known as the United States "chop suey king," stepped swiftly from the steamship Empress of Canada and headed again for the country where he once collected \$10,000.

It was just 10 years since Charlie left here for his native Canton after building up a fortune in the United States, particularly Milwaukee.

Ten years ago Charlie left for Canton with his million dollars and invested in a Chinese industrial plant. Four months ago, a Japanese war plane bombed his million dollar investment into nothing.

Ten years ago, Charlie hoped to spend the rest of his days in China. Now he is back in America, hoping to build up the investment he still retains into another fortune.

Charlie is a good deal older now than when he made his first fortune and has to help himself with a cane.

Mayor: "I will now ask you gentlemen to drink to the health of our good townsman, John Jones, on my right, who is leaving us. He was born here, he was married here, and we all hoped that he would die here. But it was not to be."

"My wife quarrels at the slightest provocation."

"Lucky man. My wife doesn't need any provocation."

It was said of Bismarck that he could keep silent in seven different languages.

Human Judgment

Less Accurate Than Simple Law Of Chance At Gambling Correctly

The human mind is not nearly so accurate as the simple laws of chance at making correct guesses. The reason is that men, women, boys and girls all misuse the laws of chance, without realizing it, when they try to predict.

These findings were explained to the American Association for the Advancement of Science at Richmond, Va. If a coin is flipped mechanically the probability of heads or tails is 50-50.

But, said Dr. Louis D. Goodflow of Northwestern University, when humans guess the flip a coin the chances are from 76 to 79 per cent they will call heads. On the second try they will still call heads often than the laws of chance allow, an excess of seven per cent. Then on third call humans will average too low, 44 per cent, in favor of heads.

The reasons, Dr. Goodflow said, are probably subconsciously. They may be due merely to the construction of the phrase "heads-tails" used to describe this little game. Heads always appears first. Therefore, without knowing it, people call heads too often.

With this study as his text, Dr. Goodflow pointed out that human judgments are not necessarily distributed according to the laws of chance.

Atla's Airmail Service

Regular Weekly Trips To Commence In Early March

Regular weekly Trans-Atlantic airmail service, forerunner of a 21-hour airmail service, York passenger service, will start before June between Southampton and Montreal, Imperial Airways announced.

The British airline announced it was ready to begin the service with four specially strengthened 24-ton C-47 flying boats travelling via Foyers, Eire, and Detroit, N.D., as soon as the Butovard hair is clear of ice.

Permission to land in New York has not been granted but the company stated "we are negotiating for a permit to extend the service to New York and expect to have it by the time service begins."

Beginning with a weekly service, two flights weekly each way are planned for later in the summer. The planes will make the east-west ocean crossing in about 16 hours. The time from Southampton to New York would be about 21 hours. West-to-east would be about three hours less.

The big flying boats at first will carry 16,000 pounds of mail and 15 to 15 passengers. The company made it clear passengers would not be carried until the schedule had been worked out.

Mud Is Valuable

Discovery In Wisconsin Said To Be Worth Millions Of Dollars

Paul worth millions of dollars has been discovered in northern states of Wisconsin and Michigan.

The mud looks like ordinary mud, but really is made mostly of diatoms, microscopic marine animal shells which are pure silica.

Dr. Conger said he found this kind of mud in 65 lake bottoms and bogs in Northern Wisconsin. When the mud was dried and the organic matter burned off, the residue was commercially valuable "diatomaceous earth." This earth is used for fine filters, such as sugar and fruit, for heat insulation, the-making and many other purposes.

Study of the Wisconsin lakes, Mr. Conger said, shows that similar diatomaceous muds will be found in Lake Superior, Lake Huron, Lake Michigan, New York and New England.

Is Increasing Rapidly

According to figures issued by the League of Nations, the population of the world is increasing by at least 18,000,000 a year. At the end of 1937 the world was inhabited by more than 2,124,000,000 people. There is considerable uncertainty regarding China's population, which is estimated at 450,000,000, which is greater than that of all Europe put together.

A modern fish-canning factory, worked entirely by Eskimos is situated at Holstenberg, Greenland, within the Arctic Circle. The factory's electric power is derived from swift-running rivers.

Smart "Two-Some" Crocheted Easily

Household Arts by Alice Brooks

Let This Set Complete Your Wardrobe

PATTERN 6268

Be irresistibly feminine in a pert tube done in single crochet and rib stitch. The effective pattern is repeated on the purl. You'll love the quilted effect of the stitch. Pattern 6268 contains instructions for making 8 1/2" materials needed; illustration of set and of stitches.

To obtain this pattern send 5 cents in coin (change cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 170 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Canadian Honey Crop

Was The Largest On Record In The Dominion Last Year

The 1938 honey crop was the largest on record in the Dominion. A preliminary estimate places total production at approximately 34,000,000 pounds, which is 12,000,000 pounds, or 56 per cent, more than the short crop (21,754,000 pounds) of 1937. The 1938 crop also exceeds the low average production of the five years 1933-1937 by 10,000,000 pounds, and the previous record crop of 1931 (22,660,000 pounds) by 4,000,000 pounds.

Weather conditions during the fall and throughout the 1938 season were favourable for the growth of honey-producing plants, and although the prolonged wet weather during the summer curtailed the gathering of nectar, increases over the production of 1937 were recorded in nearly all the provinces. The crop generally was of good quality.

In order of largest production by provinces, the estimated figures are: Ontario, 12,448,000 pounds; Manitoba, 9,899,000 pounds; Quebec, 5,214,000 pounds; Saskatchewan, 2,794,000 pounds; Alberta, 2,004,000 pounds; British Columbia, 1,594,000 pounds; Nova Scotia, 65,000 pounds; New Brunswick, 60,000 pounds; and Prince Edward Island, 11,000 pounds. The increase recorded was: Ontario, 6,128,000 pounds; Manitoba, 2,850,000 pounds; Saskatchewan, 1,651,000 pounds; Quebec, 1,625,000 pounds; British Columbia, 157,000 pounds, and Nova Scotia 15,000 pounds. The decreases were: Alberta, 160,000 pounds; New Brunswick, 20,000 pounds, and Prince Edward Island, 5,000 pounds. The exact figures of the preliminary estimate of the 1938 Canadian honey crop are 33,975,000, showing an increase of 12,241,000 pounds on the production of 1937.

Mistress: "So your married life was very unhappy?" What was the trouble? December wedding to May?"

Chloe Johnson: "Lan' sake, no, mum! It was Labor Day wedding to day of heat!"

When the house vibrated in the old days, it was caused by an earthquake. Nowadays it is sister going through her tap-dancing routine.

Now, sir, you take a deep breath? I want to see if the buttons will hold. -Koralle, Germany.

Wild Northern Outpost Giving Up Its Secrets By Investigation Of Scientists

Dog Versus Cat

Problem Solves Itself To The Satisfaction Of The Writer

In my time I have heard many arguments as to the relative merits of dogs and cats. I have heard all of the former cite their ability to learn, their obedience and their generally trusting nature. On the other hand, I have heard the fanciers of cats declare that these animals' great self-reliance and independence proclaimed a higher type of being.

I thought of these things when I read the account of the rescue recently of the captain, crew and passengers from the small Norwegian freighter Snaragard. The rescue party saved every human being and the animals besides. The men were dogs and they seemed to have behaved with unexceptional docility; the result was that they are alive to-day. But the third creature was the ship's cat and it was fractious from the first. The rescuers did their best. They put the cat in a burlap bag, but, say the news stories, it struggled with a tremendous violence and finally "asserted" itself in a suicidal burst of fierce independence by clawing its way out of the bag and jumping overboard.

I must leave to more profound minds to ponder over this lesson (if any) regarding security vs. freedom, and obedience vs. independence. As for the simpler but also ancient problem of dog vs. cat, the story solves itself. I suppose, the dog is alive to-day and I suppose happy. The cat lies full fathom five or thereabouts. -Baltimore Sun.

That's all foolishness and nonsense," Field said when asked about the deaths of the MacLeod brothers, Phil Powers and Angus Hall, and disappearance of Martin Jorgensen after he was reported to have killed the three.

"There have been deaths in the country, sure, but they can all be explained by the fact that the MacLeod brothers and Phil Powers and Angus Hall, and disappearance of Martin Jorgensen after he was reported to have killed the three.

Minor gold fields have been reported by numerous expeditions that scoured the district but nothing was found to date. The history of the district is a story of discovery and discovery.

The tropical valley myth was exploded by a former Alberta game commissioner who led an expedition into the territory. He confirmed that there were many small hot springs in a valley covering about 100 square miles and some vegetation on the hills was "rank," but he declared it was all of the temperate variety.

Christmas Programs Appeared To Please Toronto Shoppers

Last outpost of northland glamour and secretiveness, the wild Nahanni country is answering its own riddle rapidly. Today, to select a few, the qualitative scientists and gold seekers.

Fantastic word-pictures of the isolated Nahanni district, 800 miles northwest of Edmonton, are being "denuded" now—and so are spine-tingling legends of Indians' supernatural powers.

For years strange tales of the Nahanni drifted down to the outside "world" were stories of mysterious and violent drama, eerie cliff dwellings, warm valleys where huge jungle growth remained miraculously green throughout the year. Veteran prospectors heard of fabulous gold deposits in the mountainous area in the western end of the North West Territories.

Several unexplained deaths, beginning with the disappearance of William and Frank MacLeod while searching for gold, deepened the aura of mystery. Reports of rich gold mines and some vegetation on the hills were "rank," but he declared it was all of the temperate variety.

Minor gold fields have been reported by numerous expeditions that scoured the district but nothing was found to date. The history of the district is a story of discovery and discovery.

The tropical valley myth was exploded by a former Alberta game commissioner who led an expedition into the territory. He confirmed that there were many small hot springs in a valley covering about 100 square miles and some vegetation on the hills was "rank," but he declared it was all of the temperate variety.
